\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

The Base Flood Elevation at the development site is \_\_\_\_\_ above MSL (mean sea level)

\*The elevation of the lowest floor (including Basement) of proposed structure will be at an elevation of \_\_\_\_\_ above MSL. (Elevation Certificate required upon completion and before final inspection.)

\*The elevation of floodproofing of the proposed structure will be at an elevation of \_\_\_\_\_ above MSL. Attach drawings and specifications. (Floodproofing Certificate required upon completion of structure and before final inspection.)

Is the proposed building and/or development site in a FLOODWAY?

YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, the Consulting Engineer shall provide the City of Van Buren Flood Plain Manager a “Certificate of No Increase in the BFE” (base flood elevation) before proceeding.

The above requirements for the development and all provisions of community ordinances shall be complied with. The development plans submitted in duplicate drawn to scale showing the location, dimensions, and elevation of proposed landscape alterations, existing and proposed structures, and the location of the foregoing in relation to areas of special flood hazard will be reviewed and approved by the City of Van Buren Floodplain Manager. Additionally, if the approved development is located within or near a FLOODWAY, a registered land surveyor will stake the FLOODWAY BOUNDARY prior to development.

- It is required by ordinance, that the elevation of the lowest floor or floodproofing of the proposed structure be one foot (12 inches) above the Base Flood Elevation.
